

## REHABILITATION OF MATAWATCHAN ROAD

Please be advised that the Township of Addington Highlands has received funding under the Ontario Community Infrastructure Fund's application-based component for 2019. The project, which will be constructed in the summer 2019, is for the rehabilitation of Matawatchan Road, from Glenfield Road to the Township boundary to the east. The project is being planned as a Schedule A+ Municipal Class Environmental Assessment, and is anticipated to include the following work as a minimum: ditching, culvert replacements, guide rail installations, and the installation of granular and surface treatment. The project is currently in the detailed design phase with a tender call expected in the spring.

If have any questions on this project, please contact one of the following individuals:
